What is a rose vibrator?

The Rose Vibrator is a rose-shaped sucking vibrator. Sucking vibrators are different from the previous experience of internal sex play and bring women into a world of more orgasmic higher experiences. This type of vibrator is an erotic object with a sucking and vibrating function at the pistil, which uses aerodynamics and vibration to stimulate the female vulva and clitoris. The rose pistil has a nozzle at the top where he can suck on the clitoris and vibrate in more than 10 patterns, from low to high frequency, accompanied by vibrations during the sucking process that will bring you to orgasm. How to use rose toy?

I've been masturbating with the rose toy for a year now. Its exquisite appearance and practical functions are really awesome. My boyfriend and I also have sex a lot, but sometimes I enjoy orgasms in my room alone with the Rose Toy. And the Rose Toy is 100% waterproof, so sometimes when I take a bath, I put it in the tub and suck my clitoris for clitoral pleasure.

I tried its 7 sucking modes, from low to strong vibration patterns, like the rise and fall of a mountain range. I like it best from slow to fast so that the pleasure nerves in my clitoris are very happy when they are aroused to a certain level. You can apply a dab of lube to your clitoris to create a “seal” to help with attraction, Under normal circumstances, I get sexual pleasure in 30 seconds.

I also told my handsome guy that he sometimes flirts with me with a rose toy as our foreplay.

How to use a rose toy?

You can use it by yourself or with your boyfriend. When you use it by yourself, you can experience the pleasure of orgasm alone, without any disturbance. When used with your boyfriend, you can use it as foreplay, flirtation, if you often have sex, there is such a rose vibrator, will certainly make the love juice sprinkled all over the body, remember that before using the rose vibrator, you can first apply lubricant on the clitoris so that the vibrator will form a seal when sucking, will suck more exciting.

How do you use the rose toy?

Since the Rose Vibrator is very different from traditional sex toys, you need to read the manual when using it before you start using it.

First of all, lubricant is essential, and using it will make you more comfortable. First, open your labia, then use the rose sucking function, slowly sucking, starting with low intensity, if you feel the intensity is too low, slowly increase the intensity, until the increase to a strength you feel appropriate on it, without

over-stimulation, especially the first time you use it, you need to use it gently. Or you can alternate between low intensity and high intensity.

If your clitoris is particularly sensitive, then you don't need a completely sealed state because if it is completely sealed it will overstimulate your clitoris and feel uncomfortable, and sometimes you don't need an exposed clitoris because the pulses can still make your clitoris feel stimulated.

Remember to always use a water-based lubricant to avoid over-stimulation.

how to use rose toy for women?

When using a rose vibrator, you need to start slowly because the air pulses are more powerful for clitoral stimulation. Many people say that their clitoris is more sensitive and they have strong orgasms, sometimes even too fast. There are times when this rose vibrator will create multiple orgasms, something that the user does not intend. If you need a slower build-up, or pleasure once and for all, then you need to be gentle at first and stay at a lower speed, then gradually increase the intensity and then drop back for a short while and repeat until you feel ready. I like to lower the intensity a few times before orgasm because her sucking is a little too intense.

How do you use a rose toy?

We all have different stimulation preferences, so not everyone likes to treat their clitoris in the same way. Some people like broader or more precise stimulation; others like it to the right or to the left. (I like the pressure down there!) Therefore, some experimentation may be necessary to get the right stimulation. The important questions to ask before you buy are. How wide of a mouth do you want? How thick and how hard?

When enough sex toys are sold, remember to also enough to buy a water-based lubricant, because you have just become an adult, the clitoris is more sensitive, this time you need to use a lubricant to reduce the intensity of stimulation. Then start slow, find a suitable position, and when you feel right, you can gradually increase the intensity.

How to use rose flower toy?

Rose flower toy, which comes in different mouth shapes, started out as the traditional round, and as technology progressed, oval opening toys were gradually developed. Oval sex toys are significantly longer and wider than round ones, and we believe this is a huge progression because clitoral size studies consistently show that the clitoral glans (the head, the part that can be exposed) are longer than they are wide.

Many users still prefer a rounded opening, however, for the most streamlined fit, an oval would be a more accurate fit for more of the clitoris.

Size is also a potential issue; clitoral sizes, like penis sizes, come in both large and small sizes, and one product will not work with all sizes if the size difference is too great. So when you're choosing a rose sex toy, be sure to observe the size and look for the right size for you.

When using it, if you are an old hand, then you can start directly from the highest intensity, and when the orgasm is about to come, you can reduce the intensity and slowly enjoy the pleasure of orgasm.

It can stimulate two parts at the same time, namely the clitoris and the vagina. Although the traditional vibrator is liked by many people, with the development of technology, new vibrators have emerged with adjustable frequencies and also rotation and heating, which can be better adapted to ladies of different body types.

How Does a Rabbit Vibrator Work ?

[The rabbit vibrator contains three parts](#), A shaft, An external nub, Vibrations, then how it works is actually how these three parts work, the shaft is the most important one, some shafts are straight, some are curved. external hub is used to stimulate the vulva. How To Pick Your First Rabbit Vibrator?

Buying sex toys can be a bit overwhelming, except for buying brands you know, you can only go online to search for them because the privacy of sex toys makes it inconvenient for you to learn from your friends' experiences.

For sex toys, we recommend buying materials that are safe for your body, such as medical-grade silicone, stainless steel motors, because these materials are less likely to gather bacteria and are easier to clean. Please do not choose some ordinary rubber, latex, or plastic, always choose medical-grade silicone.

In addition to the material later, the price is also a factor to consider and needs to be within your budget. Then you also need to consider the strength and function, such as the intensity of vibration, is not the intensity can be adjusted, or only one intensity, it is recommended to choose the intensity can be adjusted vibrator, if there is only one vibration mode, then how this mode is not suitable for you, it can not be used, for a variety of vibration mode rabbit vibrator, the high intensity does not meet the words, you can also choose a low intensity.

Some functions need to be considered, whether it is only thrusting, whether there is a heating function, a rotation function. The heating function is likely to be of little use because we all use it indoors, sex toys have been placed indoors and do not make you uncomfortable because of the temperature, but the rotation function may be more appropriate because the rotation can bring a different experience and help orgasm.

There are four other major factors to consider

1. Power mode: is there a battery, is it rechargeable? Or does it need to be plugged in, recommended with a battery, you can carry it around this way?

2. Noise level: how much noise level? The less noise the better, because a small noise can make you feel at ease, and do not have to worry about noisy roommates or neighbors.

3. Water resistance: we recommend choosing a sex toy with good water resistance so that you can masturbate in the bath.

4. Size: size will be related to the size of the person, height is not the same, the size of the vulva is not the same, may adapt to the rabbit vibrator is not the same, so please pay attention to the size.
