

hey y'all welcome back it is tutti from

enjoyable by j.r and last time i was

talking about the vibrating

roles tongue okay

so

i remember in the last video i had told

you that i would actually do a video and

actually open it up and actually show

you guys

how the vibrating

rose tongue works okay

so before we get into this video make

sure you leave a like

and make sure you subscribe to this

video make sure you hit the notification

bell on the side to get notified every

time we make the video okay

so with that being said we're just gonna

hop right into the video

ladies and gentlemen okay

boom this is a rose vibrating tongue

okay

it is blowing up everywhere on the internet they have different sizes different colors and stuff like that this one is a smaller version of the rose tongue okay so with that being said we're gonna go open it up you're gonna see what it comes with we are gonna turn it on okay so here we go y'all so i see it comes with a charger of course you're gonna have to get the wall adapter piece that you plug into the wall this charger is kind of different so be sure you never lose this charger okay as you see it has two little magnetic bars right here and as you i mean could imagine it would be

two magnetic balls onto the rose

to

hook it together and charge it okay

so boom it comes with a nice charger

that you should never use lose okay

open it up y'all

and bam

and those are the two magnetic balls

that i was talking about

okay so it does look like a rose jar

it looked like a rose

um

a peach kind of cream looking rose

very interesting like i said before it

has the hole right here

but let's open it up and really get to

see how it looks

first i am going to use hand sanitizer

which i already briefly washed my hands

and you want to make sure you do this

anytime you're messing around with these

type of items

just to be clean and cleansy okay so

boom

rose

open it up

and it just falls like that

y'all okay

there's the tongue y'all

there's the tongue that everybody

has been going crazy for okay

so i know that this is a little more

rose and everybody's been going crazy

about they've been going crazy about the

big rose

but hey

if you're just now getting into this

you want to try something little at

first all right if you ain't used today

if you never had a rose before and you

kind of scared because it looked too big

and it looked overpowering

try try the little one first you might

like the little one

so

two magnetic walls and that is so raw

y'all that it just it's just magnetic

okay

just like that y'all

just like that and then you plug it in

to an adapter piece and you plug it into

the wall and you let it charge okay you

want to let it charge for a little bit

now let's see if the box has any

instructions

user manual

looks like it's in jack i mean japanese

whatever chinese whatever this is

um

yeah it really doesn't have too much

it's not really faint too much but you

could kind of go over that

if you want to

what we're going to do is we're going to

test it out y'all so

all right i didn't do nothing

maybe if i hold it okay yes the
indicator light comes on and they did
say that
oh
y'all
do you see it
okay that's one speed and i like it
looks so nice it kind of looks like a
candle y'all
so that's one speed
okay that's the second speed
third speed
fourth okay so four speeds are ready
oh five speeds i like that
the fast tongue
that's nice
oh
okay
yes this is the six speed okay
this kind of feels real different y'all
press it again
and then it's back so this literally has

six different speeds y'all this one is

just a chill mode

then it goes up

up

up up

yes y'all

so you get all of these molds and it's

so and to turn it off

you have to hold it

hold the button for at least about two

or three minutes two or three or no let

me stop

five seconds at least hold it down

and it will turn off so you wanna hold

it for five seconds turn it on

the indicator light turns on and then

you just want to go to work here's one

speed this speed is

oh yeah

yes you are

yes

okay

so this is a nice rose you guys and i
promised you all that i would come back
and show you
actually open it up out the box and show
you guys
how this works so now that you see how
it works
and you see that it has six different
speeds
and it's little look at this little tiny
rose with six different speeds and it's
really powerful you guys so do not sleep
on the littleness
it still does the same
job
it even has
the um
i'm going crazy on it even has the
charger
that is
magnetic okay and then you just plug it
up into the wall let it charge

the um how you know it's charging is
it'll have that yellow indicator light
turning on again
so it'll have the light on okay and when
you're done you want to carefully wash
it off don't get too much water on it
just wash it off a little bit you know
and stick it right back into here
as like so
and close it like so and this is how you
want to keep your rose you guys and even
if you want to keep it up for
decorations nobody's really going to
know that it's a vibrating tongue rose
okay
so if you liked it anything that i said
today in this video be sure to like
subscribe to this video share this video
so everybody could see um how the
rose work if you've never seen the rose
before and you just wanted to see how it
works how many speeds it is

be sure to give this video a like
comment down below if you have this rose
if you had another type of rose or
whatever comment down below feel free to
comment
if you're not from the us and you are
watching this video and you would like
to purchase this particular item
feel free to call
two five 216-254
zero two five six okay
so that way you guys could do all over
the phone purchase
of this vibrating tongue
rose okay
so i will be back up here with more
helpful videos and i will be back up
here demonstrating some of the cool
things that we have at enjoyable by jr
like i said once again
don't forget to click that notification
bell so that way you could be notified

every time we make a video
